

To Whom It May Concern,

I am writing to highly recommend Baylor Harrison, who interned as a Web Developer at WebMarkets in Boise, Idaho during the summer of 2024. During his time with us, Baylor quickly and effectively mastered technologies such as React, Preact, TypeScript, and Firebase, making significant contributions to our projects.

One of Baylor's notable achievements was co-developing Alpha SEO, a powerful tool that utilizes domain scraping and the ChatGPT API to provide comprehensive SEO analysis and recommendations. Additionally, he served as the lead developer in creating an internal client portal software that streamlined our communication processes and replaced our previous email-based system, greatly enhancing efficiency. His work with DNN and Sanity website management systems on various pages and blogs further demonstrated his adaptability and wide-ranging skill set.

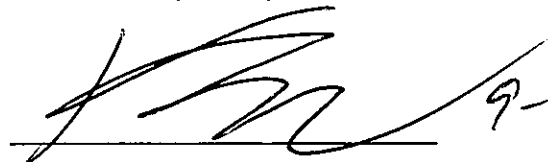

Baylor consistently showcased an impressive ability to learn and apply new concepts rapidly. His dedication was evident as he often was the last one to leave the office in a measure to ensure project success. Beyond his technical expertise, Baylor integrated seamlessly into our team, contributing insightful and creative ideas during meetings, fostering a positive and collaborative work culture environment, and competing with the company softball team.

In conclusion, Baylor is a talented, hardworking, and team-oriented developer who would be a valuable asset to any organization. He is a team player who takes a lot of pride in his work and is not afraid of putting in extra effort to accomplish his goals. I wholeheartedly recommend him for any future opportunities he chooses to pursue.

Sincerely,

Kris Lloyd, CEO

WebMarkets, Boise, Idaho
