

BAYLOR HARRISON

AI & Software Engineer | Founder, Manifold Engineering

baylor@manifoldengineering.ai | baylor-harrison.com

linkedin.com/in/baylor-harrison | github.com/BaylorH

Builds AI applications, machine-learning services and cloud systems that connect business knowledge, automate workflows and make information useful. Combines hands-on engineering with project direction and delivery.

EXPERIENCE

Manifold Engineering

Aug 2024 - Present

Founder & Software Engineer

- Built a machine-learning loan-scoring service for Till, delivering \$24,000 in annual savings, plus a five-view dashboard for lending performance.
- Built connected reporting and AI workflows for Create Spaces and property-research software for SiteSift AI. Led Axiom's AI-assisted proposal-data project, with dashboard implementation by collaborating developers.
- Created The Record, Brain and Jarvis OS: tools for project management, persistent engineering knowledge and supervised AI-agent orchestration.

FiftyFlowers

Jul 2025 - Present

AI Solutions Engineer | Jan 2026 - Present

- Built four connected AI customer-service apps, delivering \$24,000 in annual savings, with shared conversation history and a Chrome extension.
- Built AI image-editing and content tools, departmental knowledge workspaces and an AI roadmap dashboard. Migrated the internal platform from AWS Lambda to Firebase and Google Cloud.
- Developed product-data migration tools for DIY flower kits and implemented an event-proposal application from supplied wireframes.

AI & Process Innovation Associate | Jul 2025 - Jan 2026

- Built early AI shopping and DIY-kit assistants, connecting natural-language requests to product and recipe data.
- Implemented Share Your Flair submission processing and urgent-order workflows across Shopify, Asana and AWS.

WebMarkets

May 2024 - Aug 2024

Web Developer | Internship

- Independently built the company's first client portal in two weeks; adopted by all 17 employees for client communication and project workflows.
- Co-developed frontend and backend features for ALPHA SEO with the engineering team, and maintained client content through DNN and Sanity.

EDUCATION

Arizona State University

2021 - 2025

Bachelor of Science in Computer Science | Graduated May 2025

Dean's List | Merit scholarship recipient

TECHNICAL FOCUS

AI & data: Machine learning, AI integrations, retrieval and knowledge systems, workflow automation, data visualization

Application engineering: Python, TypeScript, JavaScript, React, Node.js, SQL, API design

Cloud & delivery: Firebase, Google Cloud, AWS, Git, testing, deployment, technical handoffs
